

# Griffiths Valuation 1848-1864

The Griffith's Valuation, or Primary Valuation of Ireland, was executed under the direction of Sir Richard Griffith to determine the amount of tax each person should pay towards the support of the poor within their Poor Law Union (PLU). This involved determining the value of all privately held lands and buildings in rural as well as urban areas to decide the rate at which each unit of property could be rented year after year. The resulting survey was arranged by Barony and Civil Parish, with an index to the townlands appearing in each volume.

The Griffith's Valuation (Primary Valuation) was published between 1848-1864. They started with the Valuation in the south of Ireland and worked northwards. After the initial Valuation was done follow-ups were done periodically; these follow-ups are called the Cancelled Land Books which reflect the details of all changes in the head of households.

Griffith's Valuation can be used as an excellent census substitute for the years after the Great Famine as censuses prior to 1901 were destroyed.

NOTE: A Lessor OWNS the property as a freeholder, and leases (lets) it to the Lessee who HOLDS the property as a leaseholder (similar to being a tenant, only the terms of the lease can be, say, 99 years, so there is a leasehold value which can be passed on, or transferred for a value). Sometimes property could be "sub-let" to a third party, who paid rent, usually short term, or at least, shorter than the lease itself, either because it was too big for the lessee, or so that the Lessee could make a profit on the rent as a source of income. Tenants could be evicted if they did not pay their rent. (Description Source: **County Carlow Genealogy**)
